1. Prefix letter indicates the operation, voltage, phase and hertz. If an "X" follows the prefix letter, it indicates an explosion proof pump.
2. Designates pump model.
3. Designates revisions to pump. The revision letter is required for ordering service parts.
4. P/N - part number. Identifies all of the pump features. Required for ordering service parts.
5. Identifies the month the pump was manufactured (MFG).
6. Identifies the year the pump was manufactured (MFG).
7. Signifies special construction features. Consult factory for ordering service parts.
8. Voltage required for operation of the pump.
9. Full load amperage of motor.
10. Horsepower rating of pump motor.
11. Current phase of motor. Single or three phase.
12. Current frequency of motor. 50Hz or 60Hz.
13. Revolutions per minute of motor.
14. Canadian Standards Association certification file number.
15. Motor overload protection included with pump.
